

NV disconnectors with fuses

NV disconnectors with fuses, sizes 000, 00, 1, 2, 3, 4a

Disconnectors with fuses are intended for power distribution and protection of electric equipment and cords from undesired effects of overloads and short-circuits. Naturally, these benefits apply when the disconnectors are used with appropriate NV fuse-links with characteristics that are suited for the protection of cords or motors.

We offer a wide array of disconnectors with fuses, sizes 000, 00, 1, 2, 3, and 4a, that are suitable for installation onto mounting brackets and DIN rails. You can choose from various sizes of 1-pole and 3-pole version; 2-pole and 4-pole versions will be supplied upon special request.

NEW!
